FREEDOM OF INFORMATION

REF: 2029-119
Subject: Request, Migraine

Dear Sir/Madam,

Thank you for your email dated **11/02/2026** where you requested information about **Request, Migraine.**

The information you requested is enclosed.

Question	Answer
A. How many patients have been treated with the following drugs in the past 4 months:	
• Atogepant (Aquipta) – any disease	0
• Erenumab (Aimovig) - any disease	0
• Eptinezumab (Vyepti) – any disease	0
• Fremanezumab (Ajovy) - any disease	0
• Galcanezumab (Emgality) - any disease	0
• Rimegepant (Vydura) – any disease	<5
• Botulinum Toxin (i.e., Botox, Dysport, Xeomin) - migraine ONLY	0
B. How many patients have you treated in the last 4 months for acute migraine with:	
• Rimegepant (Vydura)	Unable to provide as only inpatients are coded on our system
C. Does the trust actively initiate a treatment pause (usually at 12 months) of anti-CGRP (calcitonin gene-related peptide inhibitors) migraine treatment with the aim to re-start treatment if the patient continues to fit the criteria (Yes/No)?	**N/A** see explanation below Rimegepant (Vydura) is the only anti-CGRP we have on formulary here at the Trust which was approved June 2025 for Treatment for acute episodes only, whilst in hospital. GP will not need to continue on treatment for prevention of migraine as this will need to be initiated following recommendation from a specialist (via neurology advice & guidance currently done at Salford Royal

	NHS Trust) (RAG rated green on specialist advice)- See GMMMG Headache Management guidelines for adults.
